

# eTapestry's Segmented Gifts

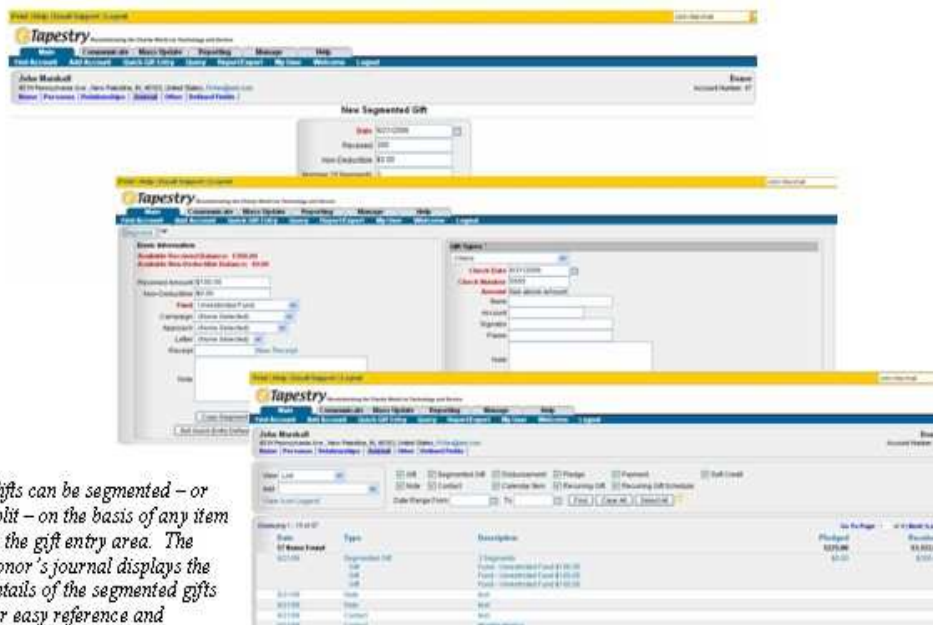

## What is it?

eTapestry's Segmented Gifts module lets you easily accommodate the entry, receipting, and reporting of gifts that need to be "split" between multiple areas, such as fund, campaign, or tributes. It quickly and easily handles transactions that involve a pledge payment plus an additional gift amount, or transactions that include payments to multiple pledges on one check. No longer do you need to manually input multiple transactions to accommodate a segmented gift. One simple screen provides all the flexibility you need.

## How does it work?

Segmented Gifts is a completely integrated module for your eTapestry system. Once turned on, you will be provided a new option during gift entry called "segmented gift". You simply define the total of the gift and the number of segments you want to input. eTapestry then builds a gift input screen that lets you quickly and easily record the details of each segment. For example, if you receive a single gift of \$150 and the donor specifies that \$100 is for the Annual Fund and \$50 is for the Research Fund, you can now easily record both segments as part of one transaction. Gifts can be receipted based on the individual segments, or on the total for the transaction.

*Gifts can be segmented – or split – on the basis of any item in the gift entry area. The donor's journal displays the details of the segmented gifts for easy reference and provides the detail on each segment by "drilling down" on the gift.*

**Summary**  
Segmented Gifts is available for an additional 10% of your eTapestry base service fee and 10% of your support fees.
